1/ Utilized production - The sum of fresh market and processed do not equal utilized production for 1934-1958 because home use is not included in the breakdown

2/ Prices - Season average price estimates were started in 1924 and represent an "as sold" price. The basis for prices changed in 1959 to an equivalent PHD price (packinghouse door or processing plant door)

3/ Fresh market and processed estimates were started in 1934 for quantity, and in 1965 for price.

4/ Minor quantity of fresh market grapes included with processing.

* Quantities of grapes used for wine during 1959-1970 included in juice.

(D) Estimates not published to avoid disclosure of individual operation(s).
